Environetics is an interior design and engineering firm dedicated to creating your organization's architecture.

Founded in New York in 1982, Environetics now comprises affiliated offices in New York City, Englewood Cliffs, Philadelphia with state-of-the-art facilities. We are known for our commitment to our clients, driven by a deep understanding of their needs, maintained through open communication and market research. Working with you as a partner is a process that is both collaborative and collaborative. We are driven and influenced by functional design, purpose, technology and environmental stewardship. We seek to understand and communicate your values.

The culture of our office is one of interdisciplinary cooperation, necessary to produce high-quality environments, with Architects, Engineers, Designers, MEP/FP Engineers working together on every stage of project delivery.

We develop and encourage our clients to become knowledge leaders in their Corporate, Academic, Health Care, Center, Residential, Manufacturing and Retail clients as they make decisions about their environments. To this end, we find synergies for our clients in these traditional sectors and combine our combined experience of design and engineering.

Finally, Environetics is committed to quality, with continuous improvement processes and tools we use to design and deliver projects that are conceived, well-coordinated and executed.
